

ENDUREX HD

Heavy Duty High Capacity Pleat

The Endurex HD pleat is constructed with the heaviest high wet-strength board frame, 2x thicker wire, and 100% synthetic media for demanding applications and providing the longest service life available.

BENEFITS

MERV 9/9A to protect coils and ductwork

Maximum service life

Lowest Resistance to airflow

APPLICATIONS

- Turbulent airflow systems
- Heavy loading
- High flow rate
- Extreme weather conditions
- High moisture units
- Long life desired

WHY ENDUREX HD

Endurex® HD is constructed with the heaviest moisture resistant beverage board frame and thickest expanded wire used for pleat support, creating an exceptionally strong filter designed for tough commercial and industrial environments. The MERV 9/9A level efficiency media is a highly durable uniform size synthetic with exceptionally low resistance to air flow. The combination of low resistance, product strength, and high dust holding capacity make the Endurex HD the longest lasting pleated filter.
